EXPERIENCE

Trulab – Durham, NC

June 2024 – Current

Product Analyst

- Spearheaded creation and prioritization of internal tooling backlog, successfully advocating for development resources to address critical technical debt and improve team productivity across three departments
- Designed and implemented an automated database export system that reduced a three-hour manual process to thirty seconds, eliminating human error and greatly improving client satisfaction
- Led end-to-end implementation of product features for enterprise clients, conducting stakeholder interviews, defining requirements, and ensuring alignment between client needs and technical specifications

Cvent – Tysons, VA

June 2023 – August 2023

Fullstack Development Intern

- Engineered solutions for frontend and backend tickets, ensured their correctness with extensive testing, and facilitated their movement through the CD pipeline until successful production deployment
- Coordinated with outside teams to create a testing plan for changes to a highly complex and critical user-facing service
- Executed a cleanup to an internal user-oriented reporting framework, earning positive feedback from project leadership

TIAA – Charlotte, NC

June 2022 – December 2022

Technology Intern

- Developed an in-house logging portal to allow for more informed management of companywide automated bot services
- Directed the technical development of an open-world Python game for a companywide hackathon, presented live to 1500+ employees, and achieved first place

University of North Carolina at Chapel Hill Research Lab – Chapel Hill, NC

March 2020 – August 2024

Research Associate

- Engineered a codebase to efficiently run performance analytics on gigabytes of historical stock information while prioritizing backend simplicity to allow for rapid team-based development
- Collaborated with business and finance partners to continuously enhance the quickly growing product

LEADERSHIP AND COMMUNITY INVOLVEMENT

CS + Social Good – Chapel Hill, NC

August 2021 – August 2024

Fullstack Developer

- Developed a custom web-app and inventory tracking system for a local food bank, PORCH, to encourage greater community involvement and streamline backend operations
- Worked in coordination with UI designers and synchronized efforts between ten team members to meet deadlines
